

Amendments to the Specification

At specification page 1/8, before the paragraph beginning with "[t]his is a nationalization of," insert the following heading:

CROSS-REFERENCE TO RELATED APPLICATION

At specification page 1/8, before the paragraph beginning with "[t]he invention relates to," insert the following headings:

BACKGROUND OF THE INVENTION

1. Field of Invention

At specification page 1/9, replace the paragraph beginning with "[t]he invention relates to" with the following replacement paragraph:

The invention relates to a cylinder for the receptacle of a printing form ~~according to the preamble of the claim 1.~~

At specification page 1/8, before the paragraph beginning with "[t]his type of printing cylinders," insert the following heading:

2. Description of the Prior Art

At specification page 1/8, before the paragraph beginning with "[t]herefore, the object," insert the following heading:

SUMMARY OF THE INVENTION

At specification page 1/8, replace the paragraph beginning with "[t]his problem is solved" with the following replacement paragraph:

This problem is solved through the ~~characterizing part of~~
~~the claim 1~~ features of the invention as described herein.

At specification page 4/8, before the paragraph beginning with "Fig. 1," insert the following heading:

BRIEF DESCRIPTION OF THE DRAWINGS

At specification page 4/8, before the paragraph beginning with "Figure 1 shows," insert the following heading and paragraph:

DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENTS

Further scope of applicability of the present invention will become apparent from the detailed description given hereinafter. However, it should be understood that the detailed description and specific examples, while indicating preferred embodiments of the invention, are given by way of illustration only, since various changes and modifications within the spirit and scope of the invention will become apparent to those skilled in the art from this detailed description.

At specification page 5/8, replace the paragraph beginning with "[u]sual practice is to fasten" with the following replacement paragraph:

Usual practice is to fasten the adapter 8 in rotation-proof manner on the mandrel 5. This can be done in many different ways. Known are the use of clamps with wedges, shrinking through heating and subsequent cooling of the disks 6, clamping of the hydraulic and pneumatic expansion chuck sleeves etc. The fastening elements 13, 14 indicate such alternatives for these methods of fastening. The fastening elements 13 fasten the disks 6 on the mandrel 5. In this manner, the entire adapter, containing the ~~rings~~ disks 6, the sleeve 7 and the fiber 3 can be fastened on the mandrel or detached from it. In contrast to that, the fastening elements 14 are in the "wrong place," because with them, only the sleeve 7 can be detached from the ~~rings~~ ~~9~~ disks 6. The fastening elements 14 are therefore only meant to indicate here that besides the classical adapter solution, in which the rings 6 and sleeve 7 are detached at the same time, other alternatives are also thinkable. In general it will not be possible to provide both the fastening elements 13 as well as 14 on the printing cylinder 1.

At specification page 7/8, after the last line, insert the following paragraph:

The invention being thus described, it will be apparent that the same may be varied in many ways. Such variations are not

to be regarded as a departure from the spirit and scope of the invention, and all such modifications as would be recognized by one skilled in the art are intended to be included within the scope of the following claims.

At specification page 1/4 (i.e., the first claims page), replace the heading with the following replacement heading:

~~Patent Claims~~ WHAT IS CLAIMED IS:

At specification page 1/1 (i.e., the abstract page), replace the heading with the following replacement heading:

~~Summary~~ ABSTRACT OF THE DISCLOSURE
